

### Incredible Features :

- ||| Electric Heating Lamp is the main product of livestock and poultry nursing breeding stage heating, available in 800W and 1600W.
- ||| Infrared heating tube, accomplishes the feat of reducing flare and increasing infrared heating output while enhancing the penetration of the heat radiation source and protecting the eyes of birds from UV ray's reach.
- ||| Lamp sheet of the product is made by high quality embossed aluminium reflectors, transmit nearly 97% of radiant energy.
- ||| 304 grade stainless steel housing, increase its dust-proof and corrosion resistance.
- ||| **Flexibility.** Users could adjust the angles according to their needs, and can place where most needed.
- ||| **Safety.** The infrared heating tube will not blast when splash by water. It's splash-proof.
- ||| **Durability.** Require zero maintenance and much easier to install and operate.
- ||| **Mobility.** This ability to move or be moved freely and easily plug and use.

### Technical Info :

	800W	1600W
Heat Output (W)	800	1600
Voltage	220 - 240V	
Covered Area (m <sup>2</sup> )	2	5
Brooding Density	1,500 birds	2,500 birds
Installation Height	100cm from rearing floor	150cm from rearing floor
Dimensions (cm)	L45 x W15 x H9	
Weight (kgs)	2.0kgs
